

INNOVATIVE PEDAGOGY

Peer assisted learning	Student to student support Eg: discuss the various atom models
Problem based learning	Development of critical thinking skills, problem solving abilities, communication based learning
Team based learning	Small group learning that emphasizes student preparation
Flipped classroom	It is a blended learning by delivering content often online, outside the classroom
Small group discussions	Students get opportunities for students to speak in front of others. It is more creative than individual
Computer assisted method of teaching	Promotes interactive learning, education management and providing additional learning opportunities
