PHP Programming Course

learn everything you need to become a professional PHP developer with practical exercises & projects.

INTRODUCTION/COURSE OVERVIEW

PHP is a server side scripting language which is used to create dynamic data-base driven websites. Dynamic websites Permit Company to manage their own content , interact with end users, add additional security and allow visitors to search for content. MySQL is a Database which is being connected to PHP. With PHP you are not limited to output HTML. You can output images, PDF files, and even Flash movies. You can also output any text, such as XHTML and XML. [DICAZO Institute Jaipur](#) provides real-time and placement focused PHP training in Jaipur. PHP (recursive acronym for PHP: Hypertext Preprocessor) is a widely-used open source general-purpose scripting language that is especially suited for web development and can be embedded into [HTML](#). Our PHP course includes basic to advanced level and this course is designed to get the placement in good MNC companies in India and abroad as quickly as once you complete the course. Our trainers for this course are PHP certified experts and many years experienced working professionals with hands on real time multiple Web development projects . We have designed this course content and syllabus based on student's requirement to achieve everyone's career goal.
