

## LESSON V:

### Barlines; Measures; Time Signatures; Ties and Slurs

Music written on the staff is divided into sections called “measures.” “Bar lines” show both the beginning and end of measures. The end of a piece is shown by a “double barline.”

#### EXAMPLE 18 -

Time signatures are placed at the beginning of a piece of music after the clef. Time signatures have two numbers. The top number shows how many BEATS there are in a measure.

#### EXAMPLE 19 - In this time signature the top number, 4 means that there are FOUR BEATS in each measure.

#### EXAMPLE 20 - In the same time signature the bottom number, 4, means that the QUARTER NOTE is worth one beat. In 4/4 time a whole note gets FOUR beats; a half note gets TWO beats, and a quarter note gets ONE beat.

Based on what you saw above, that 4/4 time signatures mean four beats to the measure and the quarter note gets the beat,

18. what do the following time signatures mean?

Three musical staves, each with a treble clef and a time signature. The first staff has a 3/4 time signature, the second has a 2/4 time signature, and the third has a 6/4 time signature. Below each staff is a blank line for the answer.

\_\_\_\_\_ beats to the measure and the \_\_\_\_\_ note gets the beat.

\_\_\_\_\_ beats to the measure and the \_\_\_\_\_ note gets the beat.

\_\_\_\_\_ beats to the measure and the \_\_\_\_\_ note gets the beat.

Three musical staves, each with a treble clef and a time signature. The first staff has a 4/2 time signature, the second has a 3/2 time signature, and the third has a 6/2 time signature. Below each staff is a blank line for the answer.

\_\_\_\_\_ beats to the measure and the \_\_\_\_\_ note gets the beat.

\_\_\_\_\_ beats to the measure and the \_\_\_\_\_ note gets the beat.

\_\_\_\_\_ beats to the measure and the \_\_\_\_\_ note gets the beat.

**EXAMPLE 22 - Beam smaller note values by beat, not across beats.**

This shows how NOT to beam notes.

It is virtually impossible to read because the eye naturally seeks out groupings by beat.

And here is the CORRECT way to beam the same notes with groupings by beat.

22. On the blank staff, beam the smaller note values together by beat.

**EXAMPLE 23 - Here's a way of counting notes whose value is less than a full beat - count "one-and (+)" or "one-uh-and (+) uh"**

23. Now write in the counts including eighth notes and sixteenth notes as shown above.

**EXAMPLE 24 - An important part of music is silence. Without occasional silence, the constant sound of music would be tiresome. There are ways to indicate the length of silence as well as the length of notes. These silences are called "rests."**

Whole note = whole rest.    Half note = half rest.    Quarter note = quarter rest.    8th note = 8th rest.    16th note = 16th rest.    32nd note = 32nd rest.    64th note = 64th rest.

**EXAMPLE 25 - Dotted Notes**

Sometimes we don't want to double a note value. If we add a dot behind the note it adds one half the value of that note. In 4/4 time, a quarter note = one beat. If we add a dot to the quarter note, it is now worth one-and-a-half beats. The same is true for any note value.

Two staves of musical notation illustrating dotted notes. The first staff shows a quarter note = 1 beat, but a dotted quarter note = 1 1/2 beats. The second staff shows a half note = 2 beats, but a dotted half note = 3 beats. The third staff shows a whole note = 4 beats, but a dotted whole note = 6 beats. The fourth staff shows an eighth note = 1/2 beat, but a dotted eighth note = 3/4 beat.

**EXAMPLE 26 - Dotted Rests**

The same is true for rests.

Two staves of musical notation illustrating dotted rests. The first staff shows a quarter rest = 1 beat, but a dotted quarter rest = 1 1/2 beats. The second staff shows a half rest = 2 beats, but a dotted half rest = 3 beats. The third staff shows a whole rest = 4 beats, but a dotted whole rest = 6 beats. The fourth staff shows an eighth rest = 1/2 beat, but a dotted eighth rest = 3/4 beat.

24. Practice by inserting barlines in the following exercises.

Six measures of musical notation in bass clef for barline insertion practice. Measure A is in 4/4 time, Measure B is in 3/4 time, Measure C is in 3/2 time, Measure D is in 2/2 time, Measure E is in 2/4 time, and Measure F is in 4/2 time.

25. Write time signatures for the following measures.

Six measures of musical notation in bass clef for time signature determination. Measure A has a dotted quarter note, eighth notes, and quarter notes. Measure B has a quarter note, quarter note, dotted quarter note, and quarter rest. Measure C has eighth notes, quarter notes, and dotted quarter notes. Measure D has a whole note, quarter notes, and quarter notes. Measure E has a quarter note, quarter note, quarter rest, dotted quarter note, and quarter note. Measure F has a quarter note, quarter notes, and a whole note.

26. Write the SINGLE note value, dotted or undotted, that is equal to the following groups.

EX. \_\_\_\_\_

27. Write the single DOTTED note value that is equal to the following groups.

**EXAMPLE 27** - Choose a time signature. Alter the notes to any rhythm you wish. Insert barlines. Just be certain that you have the correct numbers of beats in each measure according to your time signature.

MIGHT BECOME THIS

OR THIS

**EXAMPLE 28** - Now it's your turn! Here is a series of pitches -

28. On this blank staff add your time signature, change the rhythmic values of the pitches above in any way you wish, and insert barlines. Just be sure the right numbers of beats are in the measures.

29. Do it again with a different time signature.
