Mastering Advanced Prestashop

Explore the core functionalities of Prestashop

INTRODUCTION/COURSE OVERVIEW

PrestaShop is a free, open-source eCommerce application written in PHP. It is widely used worldwide and it is available in around 60 languages. It combines powerful codebase and straight-forward interface allowing even non-professional users to feel comfortable when starting a project. The script was first developed as a student project and its original name was phpOpenStore and it was first available in two languages English and French. The PrestaShop SA Company was founded in 2007 by Igor Schlumberger and Bruno Lvque. Then in 2010 the team has grown from 17 employees to more than a hundred and established a second headquarters in Miami. As a successful project with growing potential in 2014 PrestaShop was funded with $9,3 Million by Series B Funding to continue its global expansion. We provide day time classes, weekend training classes, evening batch classes and fast track training classes. To know more enroll now or find us on google.

1.3 Installing on Windows

1.4 Installing Prestashop

Prestashop Backoffice

2.1 Backoffice and category

2.2 Creating and editing products

2.3 Attributes

2.4 Features

2.5 Customizable product

2.6 Customizing

2.7 Attachments

2.8 Discounts

2.9 Mapping

Customers

3.1 clients

3.2 Notes

3.3 Customer Management

3.4 Contacts and Gender

Payment Gateway

4.1 Bank Transfer

4.2 Paypal

4.3 Verifying

4.4 Alternative ways of payment

Orders

5.1 Orders

5.2 Adding an order

5.3 The order status

5.4 Returns

5.5 Returns and vouchers

5.6 Message Order

5.7 Taxes

Statistics and Configuration

6.1 A look at the statistics

6.2 Configuration and Navigation

6.3 Search

6.4 References

Modules

7.1 Modules

7.2 Front Office

7.3 Live Edit

7.4 Recommended Modules

Firebug and Webdeveloper

8.1 intro Topics

8.3 Structure and Firefox

8.3 Firebug

8.4 Web developer

Preferences

9.1 Preferences

9.2 Preferences 2

9.3 Geolocation

Management

10.1 Administration

10.2 Quick access

10.3 Employees and profiles

Multistore

11.1 Multistore

Remote server

12.1 Server

12.2 Configuration FTP and upload

12.3 Remote Installation

12.4 BackUp

POS Module

13.1 tpv

Importing CSV data

14.1 version 2

14.2 Import

14.3 States
