

Revit MEP**Duration: 100 hrs (50hrs theory / 50hrs lab)****1. MEP Essentials**

- a. Linking Discipline Models
- b. Using the System Browser
- c. Using the Project Browser
- d. Creating and Modifying Levels
- e. Controlling Datum Visibility
- f. Using Scope Boxes
- g. Creating and Tagging Spaces
- h. Placing Space Separators
- i. Creating Color Schemes for Lighting Averages
- j. Creating Legends
- k. Creating HVAC Zones
- l. Setting and Showing the Active Work Plane
- m. Creating Reference Planes
- n. Modeling Accurately with Length and Angle
- o. Working with Object Snaps and Snap Increments
- p. Modify Ribbon Tools
- q. Using Visualization Aids When Working in 3D Views
- r. Tagging MEP Elements
- s. Coordinating Between Mechanical and Electrical Disciplines
- t. Interference Check
- u. Interference Check Documentation

2. HVAC Airside

- a. Adding Mechanical Equipment
- b. Placing Air Terminals
- c. Placing Air Terminals on Ducts
- d. Creating Duct Systems
- e. Splitting Duct Systems
- f. Duct Settings
- g. Modeling Ductwork
- h. Placing Duct Placeholders
- i. Defining Duct Routing Preferences
- j. Generating Duct Layouts
- k. Sizing Ductwork

- l. Adding Duct Accessories
 - m. Modifying Ductwork and Fittings
 - n. Adding Duct Insulation
 - o. Checking Duct Systems
 - p. Analyzing Duct Systems and Pressure Loss Reports
 - q. Understanding HVAC Airside Scheduling
 - r. Understanding HVAC Airside Tags
3. **General Piping**
- a. Pipe Settings
 - b. Modeling Piping
 - c. Placing Pipe Placeholders
 - d. Defining Pipe Routing Preferences
 - e. Adding Pipe Accessories
 - f. Modifying Piping and Fittings
 - g. Adding Pipe Insulation
 - h. Creating Parallel Pipes
 - i. Modeling Sloped Pipe
4. **HVAC Piping**
- a. Creating Piping Systems
 - b. Generating Pipe Layouts
 - c. Sizing Pipe
 - d. Analyzing Piping Systems
 - e. Creating Pipe Pressure Loss Reports
 - f. Understanding HVAC Piping Tags
5. **Plumbing**
- a. Adding Plumbing Fixtures
 - b. Using Copy and Monitor for Plumbing Fixtures
 - c. Placing Pipe Connectors
 - d. Creating Plumbing Piping Systems
 - e. Splitting Piping Systems
 - f. Creating Piping System Types
 - g. Working with Piping Components
 - h. Laying Out Plumbing Systems
 - i. Creating Risers and Underfloor Views
 - j. Understanding Plumbing Scheduling
 - k. Understanding Plumbing Tags
6. **Electrical**

- a. Electrical Settings
- b. Specifying Demand Factors and Load Classifications
- c. Cable Tray and Conduit Settings
- d. Voltage Definitions
- e. Distribution Systems
- f. Assigning Secondary Systems
- g. Wire Types and Sizes
- h. Modeling Cable Trays
- i. Modeling Conduit
- j. Creating Parallel Conduits
- k. Adding Electrical Devices
- l. Annotation Symbols
- m. Applying Panel Schedule Template
- n. Mounting Heights Parameter
- o. Electrical Label Parameters
- p. Fire Alarm Devices
- q. Grounding Symbols
- r. Settings for Grounding Wire

7. Power

- a. Reference Planes and Levels
- b. Placing Electrical Fixtures
- c. Creating and Naming Circuits
- d. Wiring Settings
- e. Wiring Circuits
- f. Checking Circuits
- g. Circuit and Pole Breakers
- h. Creating Power Circuits
- i. Creating Lighting Circuits
- j. Creating Switch Systems
- k. Annotation – Tagging
- l. Wire Placement
- m. Panel Naming
- n. Creating Panel Schedules
- o. Editing Panel Schedule Template Options

8. Lighting

- a. Lighting Fixtures and Photometric Data
- b. Placing Lighting Fixtures – Reference Planes

- c. Placing Unhosted Lighting Fixtures
 - d. Emergency Lighting Fixtures
 - e. Luminaire Schedules
 - f. Mounting Parameters
 - g. Using Copy and Monitor for Lighting Fixtures
 - h. Adding Lighting Switches
 - i. Creating a Switch System
 - j. Powering Lighting Systems
 - k. Analyzing Lighting Systems
 - l. Rendering Views to Analyze Lighting
 - m. Managing Lighting with Groups
 - n. Understanding Lighting Scheduling
 - o. Lighting Tags
- 9. Cable Trays, Conduit and Busway**
- a. Placing Cable Tray or Conduit
 - b. Placing Conduit Underground
 - c. Selecting Types
 - d. Adding/Changing Fittings
 - e. Routing Methods
 - f. Changing Justifications
 - g. Avoiding Obstacles
 - h. Creating Service Type Filters
 - i. Spot Elevations for Bottom of Cable Tray
 - j. Annotation – Tagging
 - k. Creating Parallel Conduit Runs
- 10. Views and Sheets**
- a. Plan Views
 - b. Reflected Ceiling Plan Views
 - c. Creating Section Views
 - d. Segmenting Section Views
 - e. Creating Callout Views
 - f. Sketching a Callout View
 - g. Creating Drafting Views
 - h. Setting Up Detail Views
 - i. Importing Details
 - j. Creating a Reference View
 - k. Duplicating Views

- l. Creating Matchlines and View References
- m. Creating and Using Sheets
- n. Working with Viewports on Sheets
- o. Aligning Views on Sheets
- p. Using a Sheet List
- q. Creating Custom Titleblocks
- r. Creating a Key Plan
- s. Creating Revision Clouds and Tags
- t. Managing Sheet Issues and Revisions
- u. Adding a Revision Schedule to a Titleblock

11. Printing and Publishing

- a. Printing and Managing Print Settings
- b. Printing to PDF
- c. Publishing Files to Buzzsaw

12. Managing Your Projects

- a. Managing Project Information
- b. Specifying a Project Location and Weather
- c. Understanding Coordinate Systems
- d. Relocating a Project
- e. Rotating True North and Project North
- f. Mirroring a Project
- g. Managing Project Browser View Organization
- h. Using Parameters and Filters for Browser Organization
- i. Managing Project Browser Sheet Organization
- j. Project Template Files
- k. Transferring Project Standards
- l. Deleting Unused Items from a Project
- m. Setting the Starting View

13. Interoperability

- a. Importing and Managing Image Files
- b. Linking and Importing CAD Files
- c. Managing Linked CAD Files
- d. Controlling the Coordinates of Linked CAD Files
- e. Managing Imported CAD Files
- f. Controlling Line Weights in Imported CAD Files
- g. Working with Point Clouds
- h. Working with IFC

- i. Exporting to 2D CAD Formats
- j. Exporting to 3D CAD
- k. Exporting Views to Image Files
- l. Exporting to IFC
