

## Who Are we:

SV Tutorials was formed in the year 2015, with a sole objective of providing improved quality of life to individuals and groups through training and education. Since then, the organization has strived to provide the most relevant training solutions to its students so that the student communities at large can benefit from the knowledge gained from the education provided and enhance their career progression.

Over the last two years, SVT has successfully been able to compartmentalize the entire operations into two broad verticals – Training and Education.

In the training and education space, SVT provides training in the areas of CBSE, ICSE, SSC for all subjects from standard VIIth to Xth.

To bring out the Brilliance out of your Kids, SVT has come up with Powerful Techniques:

Practical oriented learning

Multiple test series on every topic

Tricks and techniques to remember the key points of the topic

We provide a wide range of services from coaching to training, in the field of education, through a dedicated effort of professionals, devoted to ensuring success and growth of students.

## Our Concept:

The basic assumption on which the complete concept of SVT is to have group tuition rather than having a class filled with 50-60 students.

No one wants to push his/her child from one classroom in the school to another classroom in the tuition class. It is pertinent to remember that while group tuitions may work at higher classes, it may not be so for kids in the primary and middle school level where individual attention is invaluable.

## SVT Mission Vision and Goals:

SVT facilitates experiences that support student success in higher education. We create innovative programs that meet the needs of the spectrum of students in transition. We collaborate with students to address their unique needs, valuing individual achievements, concerns, and goals. Our student-centered approach supports a paradigm shift on campus toward a learning-centered environment that engages students in academic and co-curricular activities.

Through its collaborative focus and student-centered approach, the SVT advocates for students and supports them in developing their individual strengths and negotiating the challenges they encounter in realizing their potential as educated members of society. The SVT fulfills this mission by offering dynamic services including course work, academic coaching, information and referral, writing assistance, and supplemental instruction.

SVT Supports ALL students in pursuit of their academic goals and in doing so impact academic success.
