## Salesforce Admin/Development

		20.00	
Module	Unit #	Unit Name	Detail Topics
	1.1	Introduction to Cloud Computing	What is the Cloud? History of Cloud Computing, How Cloud Computing works? What is so great about the cloud?
	1.2	Understanding SaaS	What is SaaS? SaaS characteristics
	1.3	Understanding PaaS	What is PaaS? Build apps with PaaS, Why PaaS is being adopted?
	1.4	Introduction to Saleforce CRM	What is Salesforce? What is CRM? How Salesforce organizes data? Salesforce Standard and Custom objects, Introducing Lightning Experience
	1.5	Navigating Salesforce Organization	The Navigation Bar, Items and Apps for Efficient Navigation, All about Setup, Search for records
	1.6	Understand Salesforce Architecture	Salesforce Architecture, Multitenant Cloud, Understand Metadata, All about API
Module 1: Introduction to SFDC	1.7	Salesforce Editions	Different editions of Salesforce
Module 2 : Building Data Model	2.1	Understand Standard & Custom objects	Overview of Objects, Types of objects, Understand Fields
	2.2	Object Relationships	What Are Object Relationships? Types of Relationships
	2.3	Many-to-Many Relationships	What is Junction object? Create the Junction object, Create Two M-D relationship
	2.4	Work with Schema Builder	Creating object, fields and relationships
	2.5	Create Custom object Tab	Create Tab, Records
	2.6	Create and Customize Lightning Apps	What is Lightning App?, Using Lightning App Manager
Module 2 : Building Data Model	2.7	Working with Pagelayouts	Understaning PageLayouts
Module 3 : Formulas & Validations	3.1	Use Formula Fields	Using formula fields, formula editor
	3.2	Implement Roll-up summary fields	Introduction to Rollup summary fields, Defining a Rollup summary field, Examples of Rollup summary fields
	3.3	Create Validation Rules	Introduction to Validation Rules, Examples of Validation Rules
Module 3 : Formulas & Validations	3.4	Debug Logs	What are Debug logs? Debug log levels, Debug log details
	4.1	Overview of Data Security	Introduction to Data Security, Levels of Data access
	4.2	Control access to the Org	Control access to the Organization, Manage Users
	4.3	Control access to Objects	Manage object Permissions, Using Profiles, Creating Profiles, Use Permission Set
	4.4	Control access to Fields	Restrict Field access with a Profile, Add Field access with a Permission Set
	4.5	Control access to Records	Record Level Security, OWD
Module 4 : Data Security	4.6	Create a Role Hierarchy	Create and Edit Roles, Create a Role Hierarchy
	4.7	Define Sharing Rules	Extend access with Sharing Rules, Create a Sharing Rule, Define a Public Group
	4.8	Set up Audit Trails	Audit Trail Purpose
	4.9	Field Histroy Tracking	Field History Tracking Purpose
Module 4 : Data Security	4:10	Transferring Records	Mass Record Transfers
	5.1	Choose the Right Automation Tool	People Expect Automation, Meet Lightning Flow, Which Automation Tool Is Right for My Use Case?
	5.2	Use Process Builder	The Components of a Process, Process Types
	5.3	Use Flow Builder	Flow Building Blocks, Activate Your Flow, Add Your Flow to the Home Page
	5.4	Use Approval Process	Understanding Approval Process, Creating Approval Process
	5.5	Workflow Rules	What is Workflow?, Create a Workflow Rule
Module 5 : Lightning Flow	5.6	Good Bye Workflow Rules	Workflows Vs Process Builder
	6.1	Import Data	Introduction to Data Import, Method / Tools to Import Data, Steps to use Data Import Wizard
	6.2	Using Data Import Wizard	Use Data Import Wizard for importing data
	6.3	Export Data	Introduction to Data Export, Method / Tools to Export Data
	6.4	Installing Data Loader	Steps to Download and Install Data Loader
W II C D C W	6.5	Use Data Loader to Export Data	Export data with Data Loader
Module 6 : Data Management	6.6	Use Data Loader to Update Data	Update data with Data Loader
	7.1	Introduction to Reports & Dashboards	What is a Report? What is Dashboard? What is Report Type?
	7.2	Use Report Builder	Select a Report Type, Types of Filters
	7.3	Format Reports	Understand Tabular, Summary, Matrix Reports
	7.3 7.4	Format Reports Create Dashboards	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder
	7.3 7.4 7.5	Format Reports Create Dashboards Set up a Custom Report Type	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines?
Madula 7 : Panarto & Dashbaards	7.3 7.4 7.5 7.6	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type
Module 7 : Reports & Dashboards	7.3 7.4 7.5	Format Reports Create Dashboards Set up a Custom Report Type	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without
Module 7 : Reports & Dashboards	7.3 7.4 7.5 7.6 7.7	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without Declarative Case Study
Module 7 : Reports & Dashboards	7.3 7.4 7.5 7.6 7.7	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without Declarative Case Study What is Sandbox?
·	7.3 7.4 7.5 7.6 7.7	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without Declarative Case Study What is Sandbox? Different Types of Sandbox
Module 7 : Reports & Dashboards  Module 8 : Introduction to Sandbox	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox
·	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview
·	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable
·	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions,
·	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods
·	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects Manipulate Records with DML Static Variables & Methods	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods
·	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects Manipulate Records with DML	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods
·	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects  Manipulate Records with DML Static Variables & Methods Apex Properties	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sobject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods Understanding Apex property, Using Automatic properties
·	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2 9.3 9.4 9.5 9.6	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects  Manipulate Records with DML Static Variables & Methods Apex Properties Extending a class	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods Understanding Apex property, Using Automatic properties Understanding and Extending a Class
·	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2 9.3 9.4 9.5 9.6 9.7	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects  Manipulate Records with DML Static Variables & Methods Apex Properties Extending a class Interface	Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without  Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods Understanding Apex property, Using Automatic properties Understanding and Extending a Class Understanding and Implementing Interface
Module 8 : Introduction to Sandbox	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects  Manipulate Records with DML Static Variables & Methods Apex Properties Extending a class Interface With or Without Sharing	Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without  Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods Understanding Apex property, Using Automatic properties Understanding and Extending a Class Understanding and Implementing Interface Use of With and Withoug Sharing
Module 8 : Introduction to Sandbox	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects  Manipulate Records with DML Static Variables & Methods Apex Properties Extending a class Interface With or Without Sharing	Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without  Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods Understanding Apex property, Using Automatic properties Understanding and Extending a Class Understanding and Implementing Interface Use of With and Withoug Sharing Per-Transaction Apex Limits
Module 8 : Introduction to Sandbox	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects  Manipulate Records with DML Static Variables & Methods Apex Properties Extending a class Interface With or Without Sharing	Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods Understanding Apex property, Using Automatic properties Understanding and Extending a Class Understanding and Implementing Interface Use of With and Withoug Sharing Per-Transaction Apex Limits Basic SOQL Syntax, Using the Query Editor, Filtering Query Results with conditions,
Module 8 : Introduction to Sandbox	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects  Manipulate Records with DML Static Variables & Methods Apex Properties Extending a class Interface With or Without Sharing Execution Governors & Limits	Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without  Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sobjects?, Creating sobject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods Understanding Apex property, Using Automatic properties Understanding and Extending a Class Understanding and Implementing Interface Use of With and Withoug Sharing Per-Transaction Apex Limits Basic SOQL Syntax, Using the Query Editor, Filtering Query Results with conditions, Ordering Query Results, Limiting Number of Records, Accessing variables in SOQL queries
Module 8 : Introduction to Sandbox	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects  Manipulate Records with DML Static Variables & Methods Apex Properties Extending a class Interface With or Without Sharing Execution Governors & Limits	Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods Understanding Apex property, Using Automatic properties Understanding and Extending a Class Understanding and Implementing Interface Use of With and Withoug Sharing Per-Transaction Apex Limits Basic SOQL Syntax, Using the Query Editor, Filtering Query Results with conditions, Ordering Query Results, Limiting Number of Records, Accessing variables in SOQL queries Querying Related records
Module 8 : Introduction to Sandbox  Module 9 : Apex Classes	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8 9.9	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects Manipulate Records with DML Static Variables & Methods Apex Properties Extending a class Interface With or Without Sharing Execution Governors & Limits Write SOQL Queries	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without  Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods Understanding Apex property, Using Automatic properties Understanding and Extending a Class Understanding and Implementing Interface Use of With and Withoug Sharing Per-Transaction Apex Limits Basic SOQL Syntax, Using the Query Editor, Filtering Query Results with conditions, Ordering Query Results, Limiting Number of Records, Accessing variables in SOQL queries Querying Related records Understanding What is SOSL?, Difference and Similarities between SOQL and SOSL,
Module 8 : Introduction to Sandbox  Module 9 : Apex Classes  Module 10 : SOQL & SOSL	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8 9.9	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects  Manipulate Records with DML Static Variables & Methods Apex Properties Extending a class Interface With or Without Sharing Execution Governors & Limits  Write SOQL Queries Write SOSL Queries	Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without  Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods Understanding Apex property, Using Automatic properties Understanding and Extending a Class Understanding and Implementing Interface Use of With and Withoug Sharing Per-Transaction Apex Limits Basic SOQL Syntax, Using the Query Editor, Filtering Query Results with conditions, Ordering Query Results, Limiting Number of Records, Accessing variables in SOQL queries Querying Related records Understanding What is SOSL?, Difference and Similarities between SOQL and SOSL, Using the Query Editor, Basic SOSL Syntax, Single Words and Phrases
Module 8 : Introduction to Sandbox  Module 9 : Apex Classes  Module 10 : SOQL & SOSL	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8 9.9	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects  Manipulate Records with DML Static Variables & Methods Apex Properties Extending a class Interface With or Without Sharing Execution Governors & Limits  Write SOQL Queries Write SOSL Queries Get Started with Apex Triggers	Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without  Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods Understanding Apex property, Using Automatic properties Understanding and Extending a Class Understanding and Implementing Interface Use of With and Withoug Sharing Per-Transaction Apex Limits Basic SOQL Syntax, Using the Query Editor, Filtering Query Results with conditions, Ordering Query Results, Limiting Number of Records, Accessing variables in SOQL queries Querying Related records Understanding What is SOSL?, Difference and Similarities between SOQL and SOSL, Using the Query Editor, Basic SOSL Syntax, Single Words and Phrases What are Triggers?, Trigger Syntax, Types of Triggers, Context Variables, Trigger Exceptions
Module 8 : Introduction to Sandbox  Module 9 : Apex Classes  Module 10 : SOQL & SOSL  Module 11 : Apex Triggers	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8 9.9	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects  Manipulate Records with DML Static Variables & Methods Apex Properties Extending a class Interface With or Without Sharing Execution Governors & Limits  Write SOQL Queries  Write SOSL Queries Get Started with Apex Triggers Triggers and Order of Execution	Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without  Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods Understanding Apex property, Using Automatic properties Understanding and Extending a Class Understanding and Implementing Interface Use of With and Withoug Sharing Per-Transaction Apex Limits Basic SOQL Syntax, Using the Query Editor, Filtering Query Results with conditions, Ordering Query Results, Limiting Number of Records, Accessing variables in SOQL queries Querying Related records Understanding What is SOSL?, Difference and Similarities between SOQL and SOSL, Using the Query Editor, Basic SOSL Syntax, Single Words and Phrases What are Triggers?, Trigger Syntax, Types of Triggers, Context Variables, Trigger Exceptions Understanding Order of Execution
Module 8 : Introduction to Sandbox  Module 9 : Apex Classes  Module 10 : SOQL & SOSL  Module 11 : Apex Triggers	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8 9.9 10.1 10.2 11.1 11.2 11.3	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects  Manipulate Records with DML Static Variables & Methods Apex Properties Extending a class Interface With or Without Sharing Execution Governors & Limits  Write SOQL Queries  Write SOSL Queries Get Started with Apex Triggers Triggers and Order of Execution Static variables to break Trigger Recursion	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without  Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods Understanding Apex property, Using Automatic properties Understanding and Extending a Class Understanding and Extending a Class Understanding and Implementing Interface Use of With and Withoug Sharing Per-Transaction Apex Limits Basic SOQL Syntax, Using the Query Editor, Filtering Query Results with conditions, Ordering Query Results, Limiting Number of Records, Accessing variables in SOQL queries Querying Related records Understanding What is SOSL?, Difference and Similarities between SOQL and SOSL, Using the Query Editor, Basic SOSL Syntax, Single Words and Phrases What are Triggers?, Trigger Syntax, Types of Triggers, Context Variables, Trigger Exceptions Understanding Order of Execution Use of Static variable to break Trigger Recursion
Module 8 : Introduction to Sandbox  Module 9 : Apex Classes  Module 10 : SOQL & SOSL  Module 11 : Apex Triggers	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8 9.9 10.1 10.2 11.1 11.2 11.3 12.1	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects  Manipulate Records with DML Static Variables & Methods Apex Properties Extending a class Interface With or Without Sharing Execution Governors & Limits  Write SOQL Queries Write SOQL Queries Get Started with Apex Triggers Triggers and Order of Execution Static variables to break Trigger Recursion Get Started with Apex Tests	Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are sObjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods Understanding Apex property, Using Automatic properties Understanding and Extending a Class Understanding and Extending a Class Understanding and Implementing Interface Use of With and Withoug Sharing Per-Transaction Apex Limits Basic SOQL Syntax, Using the Query Editor, Filtering Query Results with conditions, Ordering Query Results, Limiting Number of Records, Accessing variables in SOQL queries Querying Related records Understanding What is SOSL?, Difference and Similarities between SOQL and SOSL, Using the Query Editor, Basic SOSL Syntax, Single Words and Phrases What are Triggers?, Trigger Syntax, Types of Triggers, Context Variables, Trigger Exceptions Understanding Order of Execution Use of Static variable to break Trigger Recursion Apex Unit Tests, Code Coverage requirement for Deployment, Test Class & Test Method Syntax, Creating Test Data
Module 8 : Introduction to Sandbox  Module 9 : Apex Classes  Module 10 : SOQL & SOSL  Module 11 : Apex Triggers	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8 9.9 10.1 10.2 11.1 11.2 11.3 12.1	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects  Manipulate Records with DML Static Variables & Methods Apex Properties Extending a class Interface With or Without Sharing Execution Governors & Limits  Write SOQL Queries  Write SOSL Queries Get Started with Apex Triggers Triggers and Order of Execution Static variables to break Trigger Recursion Get Started with Apex Triggers Test Apex Triggers	Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without  Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What is Apex?, Data Types Overview What is Apex?, Data Types Overview What are Sobjects?, Creating sObject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods Understanding Apex property, Using Automatic properties Understanding and Extending a Class Understanding and Extending a Class Understanding and Implementing Interface Use of With and Withoug Sharing Per-Transaction Apex Limits Basic SOQL Syntax, Using the Query Editor, Filtering Query Results with conditions, Ordering Query Results, Limiting Number of Records, Accessing variables in SOQL queries Querying Related records Understanding What is SOSL?, Difference and Similarities between SOQL and SOSL, Using the Query Editor, Basic SOSL Syntax, Single Words and Phrases What are Triggers?, Trigger Syntax, Types of Triggers, Context Variables, Trigger Exceptions Understanding Order of Execution Use of Static variable to break Trigger Recursion Apex Unit Tests, Code Coverage requirement for Deployment, Test Class & Test Method Syntax, Creating Test Data How to Test Trigger functionality
Module 8 : Introduction to Sandbox  Module 9 : Apex Classes  Module 10 : SOQL & SOSL  Module 11 : Apex Triggers	7.3 7.4 7.5 7.6 7.7 8.1 8.2 8.3 9.1 9.2 9.3 9.4 9.5 9.6 9.7 9.8 9.9 10.1 11.2 11.3 12.1 12.2 12.3	Format Reports Create Dashboards Set up a Custom Report Type Create a Custom Report Type Add Child objects to Custom Report Type Understanding Sandbox Sandbox Types Creating a Sandbox Get started with Apex Use sObjects Manipulate Records with DML Static Variables & Methods Apex Properties Extending a class Interface With or Without Sharing Execution Governors & Limits Write SOQL Queries Write SOQL Queries Get Started with Apex Triggers Triggers and Order of Execution Static variables to break Trigger Recursion Get Started with Apex Tests Test Apex Triggers Using seeAllData	Understand Tabular, Summary, Matrix Reports Understanding Dashboard Builder What report type defines? Steps to create a Custom Report Type Understanding With & With or Without Declarative Case Study What is Sandbox? Different Types of Sandbox Steps for creating a Sandbox What is Apex?, Data Types Overview What are Sobjects?, Creating sobject variable Different DML Statements, Bulk DML, Upserting Records, Deleting Records, DML Statement Exceptions, Database Methods Characteristics of Static Variables and Methods, Using Initialization Code, Using Static methods Understanding Apex property, Using Automatic properties Understanding and Extending a Class Understanding and Extending a Class Understanding and Implementing Interface Use of With and Withoug Sharing Per-Transaction Apex Limits Basic SOQL Syntax, Using the Query Editor, Filtering Query Results with conditions, Ordering Query Results, Limiting Number of Records, Accessing variables in SOQL queries Querying Related records Understanding What is SOSL?, Difference and Similarities between SOQL and SOSL, Using the Query Editor, Basic SOSL Syntax, Single Words and Phrases What are Triggers?, Trigger Syntax, Types of Triggers, Context Variables, Trigger Exceptions Understanding Order of Execution Use of Static variable to break Trigger Recursion Apex Unit Tests, Code Coverage requirement for Deployment, Test Class & Test Method Syntax, Creating Test Data How to Test Trigger functionality Purpose of see AllData attribute of is Test annotation

## Salesforce Admin/Development

i .			
Module 13 : Visualforce Basics	13.7	Use Standard List Controllers	Introduction to the Standard List Controller, Display a List of Records, Add Pagination to the List
			Introduction to Custom Controllers, Create a Visualforce Page that Uses a Custom Controller
	13.8	Use Custom Controllers	Create a Custom Controller Apex Class, Add a Method to Retrieve Records
	13.9	Use Controller Extensions	Building a Controller Extension
			Introduction to Static Resources, Create and Upload a Simple Static Resource,
	13:10	Use Static Resources	Add a Static Resource to a Visualforce Page
		Overriding Buttons, Links, and Tabs	
Module 13 : Visualforce Basics	13.11	with Visualforce	How to overload Buttons or links or Tabs with VF Page
			Understanding My Domain, My Domain Is Already On in Your Trailhead Playground,
	14.1	Before You Start	Define the Expense Custom Object
	14.2	Get Started with Components	Understanding Lightning Component Framework
Module 14 : Lightning / Aura	14.3	Create and Edit Components	What is a Component?, What is an App? Components Containing Components, ContainingComponents!
Components Basics	14.4	Attributes and Expressions	Component Attributes, Expressions, Value Providers, Attribute Data Types
	14.5	Handle Actions with Controllers	What is a Controller?, Action Handlers
			Server-Side Controller Concepts, Querying for Data from Salesforce, Loading Data from Salesforce
		Connect to Salesforce with Server-Side	Calling Server-Side Controller Methods, Server Calls, Asynchronous Execution, and Callback Functions
Module 14 : Lightning / Aura	14.6	Controllers	Handling the Server Response
Components Basics	14.7	Use Lightning App Builder	Understand the Lightning App Builder Tool, How Lightning App Builder works, Lighting Page Types
Module 15 : Package Metadata	15.1	Packging Metadata	Package Custom Metadata Types, Package Custom Metadata Records, Upload Packages, Install Packages
			Where to use Batch Apex?, Batch Apex Syntax, Invoking a Batch class, Using State in Batch Apex,
	16.1	Batch Apex	Sample Batch Apex Code
Module 16 : Batch & Dynamic Apex	16.2	Dynamic Apex	What is Dynamic Apex?, Access sObject and field describe information
