# Our Selenium Class Structure

A programming Language (Java or Python or C#)

Selenium WebDriver, Selenium Grid

**Some Extra Tools:** Ant and XSLT for reporting, Git and GitHub, Maven, Jenkins,

**Framework:** Complete development of Frame from scratch. We will teach **Page Object Model** framework - it covers Keyword Driven, Data Driven and Hybrid Framework. So once you learn this you can easily work on any other frameworks different organizations uses.

**Real Time Project:** Once you the theoretical part, now it's time to get your hands dirty with some live experience. You will be working on a Real Time project, that will give you same value and experience as working in project in your organization.

**Certification:** Once the course is complete, you will receive a **Course Completion Certificate** from our Institution.

# Who is our Courses For

**For Manual Testers:** If you are working as a Manual Tester, you already know that Manual Testing can only get you so far in Career, Automation Testing knowledge is a must if you want career growth. We will teach how to write simple to complicated automation script, and get a good paying Job as an Automation Test Engineer.

**For Freshers:** If you are yet to your career, we are great fit for you. We will teach you basic programming and make confident about programing and also job interviews. We will make sure you become right fit for the industry and get a good paying job.

# Who is our Courses For

**For Experienced:** If you are already working as a Software tester, our courses are designed to get you to the next level. We will teach you Framework so that you start and manage big project in your organisation. Our Real time project will give you enough experience confidently manage automation projects and take an existing project to the next level.

**For someone looking for a change in Career:** So if you are working in a different industry, and looking for entering to Information Technology, Automation Testing is a good entry point. We will teach every little things you need to be able to give Job Interviews confidently, also perform your job well when in an Organization.

# Our Training Modes

We have three modes of training:

- Classroom Training
- Instructor Led live Online Training
- Self Paced Online Learning

# Real Time Project

Once we have learned the tools, now we will work on a **Real Time Project** with a **Real Time Framework**.

We have to work on development of a Framework from Scratch. We will learn and implement the entire **Page Object Model** framework. The experience will as good as working in an Organization.

It will give you a real work experience, as a result whenever you go for an Interview you will be confident tackling the practical questions. Also, you be confident enough to handle a real project in the organization.
