

STEM is an acronym for Science, Technology, Engineering, and Mathematics. If a field of study falls in any of the four disciplines mentioned, then that program is categorized as a STEM program.

STEM MBA programs are quickly becoming popular among international students. STEM MBA programs are designed to build not only your business skills but also your technical skills. These programs bring along with it an extended visa duration which a non-STEM program does not.

In recent years, US business schools have been offering STEM MBA programs to attract international students. What a STEM MBA program offer is business skills with an emphasis on STEM applications. They include accounting, business analytics, decision theory, finance, economics, information technology, law, marketing, management, statistics, and strategy while providing business skills to be successful in management and leadership roles.

These are the advantages of **STEM programs** in the USA for students:

1. STEM Extension for F1 students in the USA

STEM students who are on an F1 visa can opt to work in the U.S. If a student opts to work in the U.S. under the 12 months OPT could extend it by 24 months.

2. Better job opportunities

Students pursuing courses related to STEM will get better job opportunities in the U.S. The number of STEM-related occupations is expected to grow at a higher rate in the United States. It is not only that they have better job opportunities they also have an opportunity to earn higher.

4. Launch your start-up

It is seen that graduates of **STEM programs** have been successful in establishing their own start-ups. For being successful you have to be creative and innovative.

Students from a STEM field are trained to think of creative ways to develop your own software or your new app or create a gadget.
