

Butterfly developmental centre was started in the year 2015 with a vision of empowering the individuals to reach their potentials.

We are well trained in handling individuals with various difficulties and challenges in academics.

Our centre mainly focus on finding the root cause of the difficulties the students are facing and try to bridge the gap between performance and potential.

What do we do?

We use several educational therapy techniques and learning strategies to motivate children to learn, to think deeply and critically, and expect more of themselves.

We give one on one session to improve Meta cognitive and cognitive abilities in an individual which positively impact children to be intellectually independent and to live life in the long run.

We start our working with the student by doing his / her educational assessment to check the level of performance and prepare a detail weekly plan and evaluate every fortnight so that we come to know the progress in his / her performance and get actual idea about which step to be taken to reach their potentials.

Services provided:

1. Early intervention
2. Behaviour therapy
3. Speech therapy
4. Remedial therapy
5. NIOS – open schooling
