We are the Information Technology training division of CMS IT Services, an IT company founded in 1976. Valued at S150 million, CMS caters to over a 1,000 large and medium global enterprises in the IT infrastructure management space across the globe. We are ranked among the best hardware, networking, security and storage training institutes in the country. We have:

- Over 50+ training centres

- Over 500 employees and 200 certified trainers

- Over a million students trained

- More than 100 corporate clients

- ISO certified-design and development centre

We offer globally accepted certifications from Microsoft, Cisco etc. and are one of the largest testing partners for Red Hat in India. Our students master the skills for IT Infrastructure Management, followed with On-Job industry training and stipends. Our training opens doors to exciting careers in technical support, facility management, projects, marketing management and back-office operations relevant to hardware, systems integration and networking.

With a strong nationwide network of over 50 training centres Regional Training centres, we are well-equipped to train students and professionals. In the last one and a half decades, over three million students and working professionals have benefitted from our training network. More than 80% of our students are placed with top IT recruiters of the country.

Our proficiency lies in identifying your talent, understanding your aptitude, analysing your needs and nurturing you to reach the zenith of technical excellence. We believe in the innate potential of each individual. Our alumni have been promoted from junior executives to team leaders, project heads and management professionals over the years.

The Certified IT & Cloud Architect (CITCA) program is about learning each and every recent technology of IT Infrastructure services. If you are looking for a career in IT, then this program will help you to gain complete knowledge on Hardware engineering, Network administration and Server administration it will

also help you to take your career to the next level with the presence of advanced Cloud, Virtualization and Storage Technologies like Hyper-V, SCVMM, RHEV, Open Stack etc. We are proud to announce that more than 10,000 students join this program each year.

The program is of 550 hours duration which includes both theory and Practical sessions. Students are tested for On-The-Job training eligibility, following which they are placed at leading desktop maintenance and networking sites across India. Successful students are also awarded stipends on the job. This training exposes students to technology implementation in various small, medium and large computing enterprises. On successful course completion, students are placed in various leading corporate sectors.

The modules like Desktop Engineering and CCNA give students a complete knowledge on Desktop administration and CISCO Router and Switch Configuration.

The CITCA program includes modules like MCSA and Red Hat administration which covers the server administration of two leading server operating systems i.e windows server 2012 and Red Hat enterprise Linux 7.
The modules like Hyper-V, SCVMM, RHEV, and Open Stack cover the complete technology spectrum with respect to Virtualization, Cloud and Storage.

The ITIL Foundation Module in the program explains all the best practices followed by every big IT corporate in handling the IT Service delivery.

At the end the program includes Boot camp module which help students to be ready to face the interviews and become more confident.

Throughout this program several soft skill and personality development sessions are conducted to mould the overall personality of the student to be ready to work in the competitive corporate environment.

BENEFITS OF CITCA PROGRAM

- **The program touches almost all the essential technologies of Hardware, Networking and Server administration.**

- As we are following the standard curriculum students are automatically trained to give the global certification exams on relevant technologies like CCNA, MCSA, RHCSA, RHCE, RHEV, Open Stack etc.

  We provide discounts for students attempting other globally recognized certificates from Microsoft, Red Hat, and ITIL.

- Our students have access to 3,600 IT services job openings in CMS IT Services Pvt. Ltd.

- An On-The-Job training on successful completion of the course, with a stipend.

- Our students are eligible for Red Hat and Microsoft participation cerlificaions.

Java Technologies- CCSP- Job Oriented Training

The Java programming language introduced by Sun Microsystems in 1995 is being used by millions of applications and websites. Now the Java platform is owned and operated by ORACLE Corporation. The presence of Java can be found in Desktop, Web or Mobile applications.
CCSP Java+ is an integrated course offered at CMS to grab the job opportunities in Desktop, Web or Mobile applications development or Database Management. As a final touch we give them soft-skill training such as preparation for interviews, communication skills and other tips in acquiring their dream job.

Dot Net Technologies- CCSP, Job Oriented Training

Microsoft technologies for client/server or web applications optimized for desktop browsers have greater importance today. But today's trend is to develop service and device dependant applications that should work with an existing array of applications that opens the chances to have interaction with a different varieties of applications.
The CCSP.NET course content empowers our candidates to develop robust desktop, web or service oriented applications. WCF based application allows to transport data between two service end points.

Training in Asp.NET with MS SQL server allows the candidate to create awesome dynamic web sites. WPF, the Microsoft DirectX based subsystem allows you to create smart graphical interfaces.

We transform the graduates and diploma holders into most demanding professionals in the software industry. As a final touch, we give them a soft-skill training such as preparation for interviews, Communication skills and other tips in acquiring their dream jobs.
