

Conditional Statements
&
Type Conversion in JAVA

Conditional Statements:-

- Conditional Statements executes one or set of statements based on a condition exactly once.
- There are four types of Conditional Statements in java
 - Simple if
 - else..if
 - Nested else...if
 - Switch case statements

Simple If Program:=

```
/* This is an example of simple if statement */
public class SampleTest
{
    public static void main(String args[])
    {
        int a = 4;
        int b = 20;

        if( a < b )
        {
            System.out.println("This is if statement");
        }
    }
}
```

If Else:=

```
/* Example of if else statement */
public class SampleTest
{
    public static void main(String args[])
    {
        Scanner sin=new Scanner(System.in);
        int age = sin.nextInt();
        if(age > 40)
        {
            System.out.println("Eligible to Covid Vaccinate")
        }
        else
        {
            System.out.println(" Not Eligible to Covid Vaccinate ");
        }
    }
}
```
