

UX Design Course

With a great requirement of excellent web user experience, it has become imperative to produce expert UI/UX designers. GIDT's UI/UX Design Course will help you understand the concept of UI and UX, followed by extensive practical training. The course will teach you the essential skills to be a professional UI/UX Designer. Here, you will be trained to gauge the user preferences based on their actions, needs, and demographics. This will also help you keep you focus on information architecture to create designs that integrate with the latest technologies. At the end of this course, you will be able to build elegant user interfaces by learning the important languages including CSS3, JavaScript and HTML5.

Along with the theoretical knowledge, you will be prepared through hands-on session on various UI/UX projects, and you will find yourself to be able to build and manipulate web apps, mobile apps, and desktop apps.
